

Open NY Fast Facts

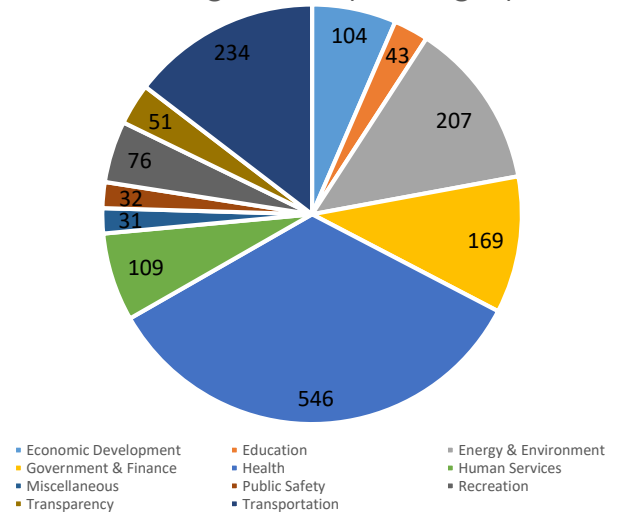

Highlights

- Information on New York State’s Low- to Moderate-Income (LMI) population is now available in tabular format on Open NY at <https://data.ny.gov/d/bui8-bb6g>, and as an interactive analysis tool on NYS Energy Research and Development Authority’s (NYSERDA) website at <https://www.nyserdera.ny.gov/lmi-tool>. The dataset is derived from the U.S. Census Bureau’s American Community Survey, and provides spatial, demographic, housing, and economic characteristics of LMI households across New York State. The Open NY LMI Dataset is intended for users with experience working with survey data files and statistical software packages who want to explore the underlying data that supports the LMI Analysis Tool. Those interested in LMI statistics and generating custom charts and graphs can leverage the interactive LMI Analysis Tool at <https://www.nyserdera.ny.gov/lmi-tool>.
- For many anglers, Spring begins on April 1 when trout season opens. The Current Season Spring Trout Stocking dataset (<https://data.ny.gov/d/d9y2-n436>) tells anglers where catchable sized trout are planned to be stocked this Spring. The Fish Stocking Lists (Actual): Beginning 2011 dataset (<https://data.ny.gov/d/e52k-ymww>) goes deeper, allowing anglers to view the fish that were actually stocked over multiple years, including both coldwater and warmwater species. This is particularly useful to anglers who want to target fish that are stocked at a small size with the expectation that they will grow before they can be caught in areas such as Adirondack brook trout ponds or walleye waters. The ability to look back at stocking over multiple years was not available prior to the data being posted on data.ny.gov. For more information on Places to Fish, visit NYSDEC’s website at <http://www.dec.ny.gov/outdoor/7749.html>.
