

ITS New York State ZIP Codes-County FIPS Cross-Reference Overview

This dataset is intended to assist data users in uniting various datasets available on NY Open Data by providing a crosswalk of county names, U.S. Postal Service ZIP codes, and Federal Information Processing System (FIPS) codes.

The dataset will contain more than one row for a ZIP code that spans multiple counties. Each county has a single unique FIPS county code, which is a combination of the FIPS state code (NY is '36') and a 3-digit county code. See <https://data.ny.gov/Government-Finance/New-York-State-Locality-Hierarchy-with-Websites/55k6-h6qq> for additional data that can be used to cross-reference state and federal codes used to designate physical or chartered municipal boundaries.

The county zip codes were sourced from the [NYS GIS Clearinghouse NYS Zip Codes SHAPE zip file, postal boundary .DBF file](#).

The FIPS county codes were sourced from the [U.S. Census Bureau 2010 FIPS Codes for Counties and County Equivalent Entities](#).
